## REACH Compliance Statement

Directive 1907/2006/EC is the European Union regulation concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH). This directive came into regulatory force on 1 June 2007 in the European Union and replaces a number of European Directives and Regulations with a single system. The REACH directive establishes provisions on chemicals and their use. Not only does this directive cover "stand alone" chemicals, but the directive also encompasses chemicals within mixtures and substances, as well as preparations of chemicals within the scope of Article 3 found in the directive. These provisions apply to the manufacture of substances, placing substances on the market, or use of such substances. "Use of substance" is interpreted as using a substance on their own, in process preparations, or in articles.

Lincoln Technology Solutions procures all materials from REACH compliant suppliers. Lincoln Technology Solutions has reviewed the REACH compliance documentation provided by our suppliers and can confirm to the best of our knowledge that all our products are in full compliance with the regulations. Lincoln Technology Solutions also confirms that no chemicals found on the Substances of Very High Concern (SVCH) list are present above the 0.1% (weight/weight) threshold.

We recommend the following internet website for further detail on the requirements within the European Union:

[https://ec.europa.eu/environment/chemicals/reach/reach\\_en.htm](https://ec.europa.eu/environment/chemicals/reach/reach_en.htm)

If you have further need to review REACH compliance or have questions about the implications on your products, we would be pleased to review them in more detail with you.

Regards,
